

**Testimony: Support HB 6200  
Public Health Committee Public Hearing**

**Thank you for taking the time to hear my plea for help.  
I have been suffering with lyme disease for many years, I have been through  
so many tests but never diagnosed or treated until 1 year ago.  
I suffer daily with pain, memory loss, vertigo to mention a few major  
daily struggles but the worst is fatigue and just giving every ounce of  
energy to get out of bed in the morning and do simple tasks.  
My life went from active to happy to get to work and home.  
Please consider this bill, our health and the health of those children  
who are following behind us.**

**Thank you for your time,**

**Kathy Starke**

**Preston, Ct**
